

LALIT MITTAL

Jaipur, Rajasthan, India • mittallalit169@gmail.com • +91 89555 42573 • [GitHub](#) • [LinkedIn](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (JECRC University) with hands-on experience building production-ready AI systems, including LLM-based test case generators, NLP-powered resume analyzers, a computer-vision driver-safety system, and a full-stack AI SaaS product. Proficient in Python, React, and modern GenAI tools. Seeking an internship or entry-level role to contribute and grow within a dynamic IT team.

EDUCATION

B.Tech, Computer Science Engineering – JECRC University, Jaipur 2023 – 2027

CGPA: 7.6/10 | Coursework: DSA, DBMS, OS, Machine Learning, Web Technologies

Senior Secondary (Class 12), Science (PCM) – RBSE Board 2022 – 2023

Percentage: 81.40%

TECHNICAL SKILLS

Languages: C, C++, Python

Web Development: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React.js, Node.js, Three.js

AI / ML: Machine Learning, Deep Learning (CNNs, Transfer Learning), Computer Vision, Generative AI, LLM Applications, NLP, RAG, Neo4j

Tools & DevOps: Git, GitHub, VS Code, MS Office, Docker, Stripe, JWT

EXPERIENCE

Backend Developer Intern – Akeo Software Solutions | Jaipur (On-site) June 2025 – July 2025

- Completed intensive backend training in Node.js, Express.js, and Next.js, building and consuming RESTful APIs.
- Contributed to an LLM + RAG-based AI Test Case Generation System using Hugging Face models and RAG workflows for structured output generation.

PROJECTS

WakeGuard – Real-Time Driver Drowsiness Detection System | Python, OpenCV, MediaPipe, TensorFlow/Keras, Pygame

- Built a real-time multi-signal drowsiness detection system (MediaPipe face landmarks, EAR/MAR, solvePnP-based head-pose) with automatic event logging and an analytics dashboard; added an emergency-contact escalation alert for unresponsive drivers. github.com/mittal-lalit/WakeGuard
- Trained a MobileNetV2 transfer-learning CNN eye-state classifier (98.3% validation accuracy on 67K+ images) as a second, learned signal in an ensemble alongside the geometric detection methods.

AI Test Case Generation System | Python, LLMs, RAG, Neo4j

- Built an AI system using LLMs and RAG to auto-generate test cases from requirements, reducing manual effort by ~60%; integrated a Neo4j knowledge graph for requirement traceability, improving coverage mapping accuracy. github.com/mittal-lalit/graph_rag

RoomAI | React, Node.js, MySQL, Three.js, Framer Motion

- Full-stack AI interior-design SaaS with a WebGL 3D hero, real-time style morphing, JWT auth, Stripe payments, and Claude/Replicate AI integration. github.com/mittal-lalit/RoomAI

CERTIFICATIONS & ACHIEVEMENTS

- Hackathon Winner – Proagify College Hackathon (AI solution built in 24 hours)
- 150 Days DSA Challenge – consistent daily problem-solving on competitive platforms
- Member, Coding Club at JECRC University – workshops, contests, peer coding sessions

SOFT SKILLS

Problem-Solving • Team Collaboration • Communication • Time Management • Adaptability • Attention to Detail
